Pin connectors	B82
H-tap insulating covers	B83
Parallel splices	B85
Heavy-duty battery/ connectors and tools	B86
Accessories and miscellaneous hardware	B94

Overview

The Color-Keyed method is better

The Color-Keyed method of installing compression connectors on power cables is designed to provide a high degree of reliability in electrical wiring.

This method allows electrical workers to make installations with little effort and at a considerable savings in time. The benefit, of course, is a high-quality connection at a low installed cost.

Blackburn connectors featuring the Color-Keyed system are banded by colored stripes or engraving to indicate location of die on connector for compression. ABB uses full-width and half-width dies dependent on connector size and tool used.

Half-width dies are marked with the letter “H” after the die code number. Refer to the instruction sheet supplied with the connectors for information regarding strip length, die selection and number of compressions required.

—
Just four easy steps to a perfect connection!

01

—
01 Strip the insulation
—
02 Stripping types and conductor connections

Step 1

Carefully strip the insulation on de-energized wires to avoid nicking or cutting conductors (wire brush if required).

Stripping types:

- **A** – Strand cut
- **B** – Nicked strands
- **C** – Good strip

02

Strip the insulation to the proper length so that conductors can be fully inserted into the connector barrel.

Conductor connections:

- **D** – Strip length too long
- **E** – Strip length too short
- **F** – Strip length just right

03

- * Aluminum lugs with a "9" indicate 90 °C rating
- 03 Select the connector for the cable size
- 04 Connector types and markings

Step 2

Determine the proper Color-Keyed connector for the cable size being used. Connectors are marked to show cable size and material:

- **G** – Cable size
- **H** – Copper (die located BETWEEN bands)
- **I** – Aluminum (die located ON bands)

04

Connector types:

- Connectors marked with just cable size or CU should be used on copper conductors only
- Connectors marked "AL9" with the cable size should be used on aluminum conductors only
- Connectors marked "AL9CU" with the cable size may be used on aluminum or copper conductors

05

- 05 Select the installing die
- 06 Color-Keyed bands and die location for compression

Step 3

Select the proper installing die and appropriate tool. Blackburn connectors featuring the Color-Keyed system have colored bands or colored dots that correspond to color markings on the dies.

Connectors and dies also have a die code number marked or stamped on them. Dies have a code number engraved in the crimp surface.

06

Step 4

Locate tool with correct die in proper position on connector and activate tool. When making multiple crimps, make the first crimp nearest the tongue and work towards the barrel end.

When properly crimped, the die code number will be embossed on the connector for easy inspection to determine if correct die and connector combination were used.

Overview

Precision dies for homogenous mass

The Color-Keyed method utilizing compression tools with matching dies forms the connector and conductor into a solid, homogenous mass to provide an optimum electrical bond between connector and conductor.

—
01 Locate tool with correct die in proper position on connector and activate tool.

—
02 Before compression, a typical cross section of cable and connector consists of about 75% metal and 25% air.

—
03 After air compression by the Color-Keyed method, the cross section looks like this, nearly 100% metal with virtually no air spaces.

Color-Keyed method dies are designed to produce a circumferential, hex- or diamond-shaped compression rather than a simple indent. Precision dies are an integral part of the ABB method.

The precision hardened steel dies exert tremendous, controlled pressure on the connector and conductor. The dies compress the connector around the cable, converting the round strands to hexagonal or diamond shapes and forming the strands and connector into a solid mass. Each die is designed so that all conductors receive the same amount of compression force.

The circumferential compression creates a large area of high-pressure contact between cable and connector which, in turn, assures high conductivity, low resistance, and high pullout values which exceed UL requirements. These features result in a permanent, low installed cost connection. You can install it, and forget it.

The Color-Keyed system tells you where to place the installing die

Blackburn connectors featuring the Color-Keyed system not only identify the correct installing die to be used for positive compressions, but also indicate the proper placement of the die on the connector. This is done by the bands of color on the connector which match the color on the dies. Compression is made between or on these color bands. The color name is also spelled on the connector as an added means of identification.

Color-Keyed dies offer inspection capability

Dies that are used in Color-Keyed hand and hydraulic tools contain the “die code” numbers which are engraved on the compression surface of the die. Under compression, this number becomes embossed on the completed connection for inspection purposes. The inspector compares the die code number embossed on the connector with the die table to ensure that the proper connector was compressed with the correct die for that particular size conductor.

Battpac® LT Pump
350 kcmil AL. The battery-powered hydraulic pump, rated for 10,000 psi. Portable power for all Color-Keyed hydraulic heads, using just one Ni-MH 24V rechargeable battery.

TBM62PCR-LI
Designed for one-handed control ram advancement and retraction. Capacity up to Cu #8-600 kcmil Al #8-400 kcmil.

TBM6S Hand-operated crimping tool features Shure-Stake mechanism to ensure a completed crimp. For connectors up to 500 kcmil Cu, 350 kcmil Al.

Quality tooling with the Shure-Stake® mechanism

Color-Keyed manual tools with the exclusive Shure-Stake mechanism take the guesswork out of making compression connections. The Shure-Stake mechanism provides a full cycle compression stroke every time. Once the stroke has started, the tool will not release the connector until the proper amount of force has been applied. This is your assurance of a fully compressed connection. ABB compression tools develop uniform, controlled pressure to each connector within their size range. Color-Keyed offers electric and battery-powered hydraulic pumps with a Shure-Stake feature that guarantees a full cycle compression.

Color-Keyed method components meet industry standards

Depending on the application, all Color-Keyed copper connectors meet UL Std. 486A for code stranded and 24 gauge flex, CSA Std. C22.2, No. 65 600 V requirements for power and UL Std. 467, CSA Std. 22.2 No. 0.4 requirements for direct buried grounding.

Color-Keyed method connectors are available in a range of sizes and styles to accommodate #8 AWG through 1000 kcmil and larger copper or 2000 kcmil and larger aluminum cable. They may be compressed

on cable with either manual or hydraulic tools. They are offered with standard length or long barrels,

with one bolt or two bolt holes, or in two-way styles, for splicing applications. Two-way connectors are compact, providing high pullout values with low resistance.

Blackburn two-hole lugs featuring the Color-Keyed system are ideal for bus bar applications that require two bolts to prevent lug rotation. The Color-Keyed method is the most efficient, highest quality connection that has been engineered and delivers the best electrical performance and highest reliability.

Color-Keyed compression connectors eliminate risk of problems relating to loose connections when installed properly.

High-grade materials incorporated in Color-Keyed method

Low installed cost connections of superior quality can be achieved only through the use of high-grade components. That is an important part of the ABB method – quality products you can depend on.

Copper Blackburn connectors featuring the Color-Keyed system are made of high-conductivity wrought copper, and are electro tin plated to prevent corrosion and to improve conductivity. Color-Keyed Blackburn connectors featuring the Color-Keyed system offer the thickest tin plating in the industry. Other copper connectors for heavy-duty use and grid grounding applications are made of high-conductivity cast copper, bright finished.

High-conductivity cast aluminum connectors are available for heavy-duty application.

Overview

Special lugs – Angled, shaped and trimmed

ABB can solve your difficult wire bending and terminating problems in confined power distribution panels, switchgear and motor control enclosures.

— 01 Special lugs – Angled, shaped and trimmed

— 02 Examples of customized connectors for copper cables

We have the design and production capability to deliver exactly the type lug you need, shaped the way you need:

- Straight, 15°, 30°, 45°, 60° and 90° angle
- Stacking or non-stacking
- Narrow tongue or standard
- Tin, silver, lead, nickel

ABB offers an extensive line of copper Blackburn lugs featuring the Color-Keyed system for #8 AWG through 1000 kcmil flex and code cables. The lug tongues are modified in several different configurations to meet your exact needs: 45° and 90° bend angles, narrow tongues to fit into circuit breakers, offset tongues to stack two cables and special stud hole drilling.

These special configurations let you:

- 1) Run cable directly to the bus bar with no bending.
- 2) Terminate into very narrow spaces.
- 3) Utilize minimal bus bar space.

Customized connectors for copper cables

- Standard and special tongue angles, stacking and nonstacking, bolt holes sizes and centers, protective platings.
- Specially modified one- and two-hole copper compression lugs, series 54100, 54200, 54850BE and 54930BE for flex and code copper stranded cables. Material: high conductivity wrought copper.
- Minimum order quantity: Standard package quantity by cable size. Consult factory for price and delivery. All customized lugs are made to order. A.R.O. Non-cancelable.

Overview

Order form

Order form (For 54100, 54200, 54800 and 54900 series copper lugs only):

Catalogue number: **Quantity:**

Notes:

Notes:
 1) Lack of any of the extra features on the "MADE-UP" catalogue number means that the standard cat. no. features are prevalent.
 2) If either bolt hole size or distance between bolt holes needs to be changed from standard cat. no., both code numbers will appear on the "MADE-UP" cat. no. (See example below)

Code table

Tongue shape		Bolt holes		Bolt hole centers		Stacking		Finish (plating)		Inspection hole (long barrel)		Inspection hole (short barrel)	
Type	Code	Size	Code	Distance	Code	Type	Code	Type 1	Code	I.D.	Code	I.D.	Code

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your regional sales office for sizes not listed. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Material – High-conductivity wrought copper

Finish – Electro tin plated

One-hole lugs – 45° Standard barrel certified to 600 V and recommended up to 35 kV*

Diagrams

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your regional sales office for sizes not listed. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Material – High-conductivity wrought copper
Finish – Electro tin plated

One-hole lugs – 90° Standard barrel certified to 600 V and recommended up to 35 kV* (continued)

Diagrams

* Blind end

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your regional sales office for sizes not listed. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Material – High-conductivity wrought copper
Finish – Electro tin plated

Two-hole lugs – Standard barrel certified to 600 V and recommended up to 35 kV* (continued)

Diagrams

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your regional sales office for sizes not listed. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Peep holes available – Add suffix PH

Material – High-conductivity wrought copper

Finish – Electro tin plated

One-hole lugs – 90° Long barrel certified to 600 V and recommended up to 35 kV*

Diagrams

* CSA not applicable

For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your regional sales office for sizes not listed. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Peep holes available – Add suffix PH

Material – High-conductivity wrought copper

Finish – Electro tin plated

Two-hole lugs – Long barrel certified to 600 V and recommended up to 35 kV* (continued)

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your regional sales office for sizes not listed. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Peep holes available – Add suffix PH

Material – High-conductivity wrought copper

Finish – Electro tin plated

Two-hole lugs – 90° Long barrel certified to 600 V and recommended up to 35 kV* (continued)

Diagrams

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. Call your regional sales office for sizes not listed. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Narrow-tongue lugs – Ideal for confined-space terminations

To meet increasing demand for smaller components in today's panels and switchgear, ABB has expanded its line of Color-Keyed narrow-tongue lugs to include two-hole and angled lugs. These improved lugs have been precision engineered for consistency in width the entire length of the connector, from barrel to tongue, ensuring a reliable fit in confined-space applications.

- Narrow-width tongue and barrel, engineered for dimensional consistency the entire length of the lug
- Perfect for connections in limited-space applications
- High-conductivity copper construction
- Electrolytically tin-plated finish resists corrosion
- ABB Color-Keyed marking system makes connections and verification easy
- Double-chamfered barrel eases insertion of wire

Technical specifications

- Certified rating: 600 V
- Recommended rating: Up to 35 kV^Y
- Material: 99% pure high-conductivity seamless wrought copper
- Finish: Electro tin plated
- Standards: UL listed, CSA certified and RoHS compliant

Ideal for use in:

- Panels
- Switchgear
- Molded-case circuit breakers
- Motor starters
- Other limited-space OEM applications

Now available in:

- One-hole
- Two-hole
- Straight
- 45° angled
- 90° angled

^Y For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.

Diagrams

Catalogue numbers 54878BENTPH and 58884BENTPH include peep holes.

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.

* Special lugs may have other catalogue number constructions. Please contact technical services.

Ordering information

Other options include silver plating (add SP to catalogue number), blind end (add BE to catalogue number) and peep holes (add PH to catalogue number).

Catalogue no. example:

54212NTUB is a 90° angled one-hole narrow-tongue lug for #1 AWG.

Compression connectors for copper conductors

These Color-Keyed connectors are recommended for up to 15 kV applications. Installed with standard ABB 14 and 15-ton compression tools with special rounding dies, the compression forms the connector and conductor into a solid mass to provide an optimum electrical bond between connector and conductor. The rounding die overlapped compressions provide a smooth round surface. This combined with the tapered barrel ends, addresses the control for potentially damaging electrical stresses of high voltages.

Copper one-hole lugs – Certified to 600 V and recommended up to 15 kV

Diagrams

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.

* Heavy-duty copper lugs for flexible strand cables 600 V not UL or CSA listed.

• CSA not applicable.

For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Material – Cast copper

Color-Keyed method – Traction motor disconnect lugs for diesel-electric locomotives

Diagrams

Note: some parts may not be current on the system. Consult your regional sales office for informations.

Tooling: all hydraulic tools 12 tons and up.

For use in mechanically splicing traction motor wires. MES Flex (B) and DLU.

* Supplied with elongated bolt hole.

Compression connectors for copper conductors

One-hole metric lugs

Color-Keyed metric lugs are manufactured from electrolytic copper tube. The dimensions of the tube are designed to obtain the most efficient electrical conductivity and mechanical strength, resisting vibration and pullout. Color-Keyed metric lugs are annealed to guarantee optimum ductility, which is a necessity for compression connectors having to withstand severe deformation arising when compressed or bending of the tongue that may happen during installation. Connectors have to perform adequately with vibration loads, and annealing is necessary to avoid material failure between the barrel and the tongue.

The presence of an inspection hole facilitates full insertion of the conductor, and the barrel length is designed to allow easy and accurate positioning of the dies during the crimping operation. Lugs are electrolytically tin-plated to eliminate oxidation of the copper material. Color-Keyed metric lugs complement our connector family and meet a growing need for customer's connector requirements. Details of the appropriate crimping tools and dies are included. Our ABB sales representative group is always available to provide any technical advice required. Please contact them if sizes are needed additional to those shown in this catalogue.

Compression connectors for copper conductors

Narrow-tongue metric lugs

Color-Keyed narrow-tongue metric lugs feature a contained tongue width.

Our lugs have been specifically developed for applications with low voltage circuit breakers with reduced space requirements. The tongue width allows a quicker and easier installation.

Color-Keyed narrow-tongue metric lugs are manufactured from electrolytic copper tube.

The specific design of the barrel and dimensions create the best combination of mechanical strength and electrical conductivity.

Color-Keyed narrow-tongue metric lugs are annealed to guarantee optimum ductility and are electrolytically tin-plated to avoid oxidation. The barrel is provided with an internal chamfer for easy insertion of the conductor.

The length allows easy positioning of the dies for proper crimping.

Narrow-tongue metric lugs

Compression connectors for copper conductors

Two-way metric splice connectors

Color-Keyed metric splice connectors are designed for joining low voltage conductors.

Made of electrolytic copper tube having similar dimensions to the Color-Keyed metric lugs, these connectors are also annealed and electrolytically tin-plated.

They feature an internal chamfer at both ends. For easy insertion of the conductor, a center stop is provided to ensure correct positioning.

Two-way metric splice connectors

Compression connectors for copper conductors

Material – High conductivity wrought copper

Finish – Electro tin plated

Two-way connectors provide high pullout values, are easy to insulate and provide a low-resistance connection of high quality and low installed cost.

Two-way splice connectors – Standard barrel certified to 600 V and recommended up to 35 kV[†]

[†] For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.

Use hydraulic tools with hex dies 13642M, 13400 and 21940.

For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Compression connectors for copper conductors

Constant O.D. enables faster, easier installation than contoured design

Cast-copper reducing splices

ABB takes the splicing of different-sized conductors to a new level of economy and efficiency with Color-Keyed cast-copper reducing splices. In addition to a lower cost, the key benefit to these splices is in their constant outer diameter. Unlike screw-machined, externally contoured splices, cast-copper reducing splices require no change of tool or die between crimping each end. Just slide each wire easily into the chamfered barrel and use the same Color-Keyed tool and die to crimp both ends. The consistent O.D. also makes these splices faster and easier to insulate with clear heat-shrink wrap than a contoured splice. Sand-cast construction ensures high-tensile strength for heavy-duty applications and tin-plated copper material provides high conductivity and superior corrosion resistance.

- Ideal for telecom (inside office/outside plant), commercial, industrial MRO and any other certified to 600 V and recommended up to 35 kV[†] applications requiring splicing of different-sized conductors.
- Tin-plated, sand-cast copper construction provides superior tensile strength, high conductivity and excellent corrosion resistance.
- Easier to install and insulate than screw-machined, contour-designed reducing splices.
- Constant O.D. saves time on installation by eliminating the need for crimp-tool/die change.
- Fast and simple to insulate with clear or coloured heat-shrink wrap.
- Chamfered barrel facilitates easy wire insertion.
- Compact, low-profile design takes up minimal space in cable tray or wire run.
- Simple installation with Color-Keyed crimp tools (12, 14 and 15 ton).

* Use with adaptor cat.no.15500-TB.

† 63105 also installed by TBM5/TBM5S with 13455 die or TBM8/TBM8S with 13462 die.

• 63148 - #1 CU or AL - wire bent double (hairpin).

For Smart™ tools installation

63110,63118,63125: Use TBM8-750HG

63140,63148:Use TBM8-750BH

For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Interlocking insulating covers for compression taps

Better covers for taps

- 01 Smaller size requires less space in enclosure. High-impact polypropylene for rugged, dependable use.
- 02 Clear, polycarbonate (UL94V-0) version available.
- 03 Easy latch mechanism.

Soft shell H-tap/C-tap covers

ABB offers an improved design for one-piece covers for H-tap and C-tap connectors. The design is more size-efficient and includes an easy latch mechanism. The new covers also contain flash barriers to help protect against electrical flash overs. The covers are molded from high-impact polypropylene (UL94V-1) and are UL® listed, CSA certified to 600 V applications at 105 °C.

The soft shell covers include these features:

- **Size-efficient design**
Won't take up as much room in the enclosure or vault, easier to store and carry to the job site
- **Easy latch mechanism**
Quick but sturdy cover latch for optimum insulation
- **Flash barriers**
Provides protection from electrical flashovers
- **105 °C rating**
Offers maximum performance and higher than many competitors' temperature ratings
- **High-impact polypropylene**
Constructed from rugged materials for long-lasting protection

Also available in clear, impact-resistant and flame-retardant polycarbonate (UL94V-0). The clear version includes an internal pocket for a visible identification label without opening the cover. Contact Customer Service for shipping and availability.

Wire joints for copper conductors

All-around compression ensures high conductivity, low resistance and high pull-out values exceeding CSA requirements

Compression wire joints for copper conductors

- Ideal for pigtailing, tapping multiple conductors or two-way splicing
- Form a permanent installation in minimal space
- Easily insulated
- Offer lowest installed cost
- Made of high-conductivity copper and electro tin-plated
- Colored-coded to dies for positive matching and compression

Cast copper bus taps for copper conductors

Clamps onto bus bar — no drilling required

Heavy-duty bus bar taps – certified to 600 V and recommended up to 35 kV^v applications

Material – High-conductivity cast copper alloy

Finish – Electro tin plated

Contact material – Beryllium copper

- For bus bars up to ¼ in. thick, 3–6 in. wide and code copper cable
- Take up less than 1¼ in. of bus bar space
- Convex shape of connector tongue exerts great contact pressure on bus bar
- Install with hydraulic tools and hex crimp dies

Heavy-duty bus bar taps – Certified to 600 V and recommended up to 35 kV^v applications

Figure 2

Double cable—Use AD suffix

Styles shown have cable tap on one portion of clamp assembly. Clamp assemblies with cable taps on both portions (top and bottom identical) are also available.

These assemblies are identified by adding suffix "AD" to catalogue numbers shown (example: 251-31446-1AD).

Only one hydraulic tools with hex crimp dies TBM12.

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.

For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Motor pigtail connectors

Quick, reliable change-out of electric motors with no bolting, taping or loose connections

One line to one load (two wires)

- Complete line of motor lead disconnects for 600 V and 5 kV applications, covering wire range from #16 through 4/0 AWG
- Fast, snap-together assembly offers maximum labor savings
- No need for nuts, bolts and washers or insulating tape – simply slide on reusable boot
- Total assembly fits into tight motor housings
- Quick disconnect – no knife cutting of melted tape, eliminating the risk of accidental cutting of wire insulation, resulting motor downtime and installer exposure

- Meet or exceed electrical and mechanical performance of bolted connections
- Constructed of high-conductivity copper with tin-plating
- Female disconnects equipped with beryllium copper interface band for dependable connections

Female disconnect

Male disconnect

Motor pigtail connectors

Quick, easy installation

600 V version

5 kV version

One line to one load (two wires) (continued)

- 1) Choose appropriate Color-Keyed disconnect for conductor size to be terminated. Note color of bands on disconnect barrel.
- 2) Select proper installing die by matching die color to disconnect barrel color bands.
- 3) Install die in ABB tool, insert stripped wire into barrel of disconnect and compress between color bands. Repeat for mating half.
- 4) Snap the two halves together and slip on insulator over mated connection. Secure insulator with Ty-Rap® cable ties provided with the insulators.

Material – High-conductivity cast copper

Plating – Electro tin plated

Insulator – Thermoplastic elastomer

Contact Material – Beryllium Copper

One line to one load (two wires) (continued)

Diagrams

Operating range: 600 V max., 1000 V max. in signs and fixtures.

Listing: UL listed and CSA certified for 12/8 AWG solid copper conductors and stranded copper conductors in the sizes shown.

Selection: Always use the same body size when selecting male and female disconnects.

For example: to connect a 2 AWG male to an #8 AWG female, select cat. no. M2DM-2 and MD8F-2. Both have body size 2.

Insulation: Use insulating boots matching the disconnect body size as indicated in the chart.

To protect the connection from moisture and dirt, use sealing compound cat. no. MDBOOT-SEAL.

For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Motor pigtail connectors

5 kV motor pigtail connectors supplied with boot, pin, silicon gel (two female connectors required)*

Diagrams	Cat. no.	Wire range (AWG)	Female disconnect Cat. no.	Colour code	Dimensions in. (mm)			Body size
					L	W	H	
	5KVBOOT-2L (connection pin for two female connectors included)	#8	MD8F-2	Red	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	2
		#6	MD6F-2	Blue	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	2

		#2	MD2F-2	Brown	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	2
		#1	MD1F-2	Green	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	2
	5KVBOOT-3L (connection pin for two female connectors included)	#2	MD2F-3	Brown	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	3
		#1	MD1F-3	Green	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	3
		1/0	MD10F-3	Pink	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	3
		2/0	MD20F-3	Black	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	3
		3/0	MD30F-3	Orange	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	3
		4/0	MD40F-3	Purple	4.50 (114.3)	2.25 (57.2)	1.44 (36.6)	3

CSA and UL non applicable.

* Male pin supplied will fit all ranges and combinations of wire sizes per body size.

Sealing for motor-disconnect boots

Sealant should be used with ABB motor-disconnect boots: MDBOOT-O, MDBOOT-1, MDBOOT-2 and MDBOOT-3. The cable should be clean and free of grease and other foreign substances. Apply two layers around each cable at the same distance from the connector. Slide the assembly into boot, apply Ty-Rap cable ties and work sealant around wires at end of boot to eliminate voids.

Technical specifications

- Description: polybutene compound
- Application temperature: 4 °C to 38 °C (40 °F to 100 °F)
- Service temperature: -40 °C to 82 °C (-40 °F to 180 °F)
- Dimensions: width 1 in., thickness 1/8 in., length (std. roll) 10 ft., wrapped on release liner
- Environmental resistance: resists normal aging process
- Chemical resistance: resists acids, bases and alcohols
- Dielectric strength: 200 V/mil minimum
- Volume resistivity: 1013 ohms/cm
- Flame retardancy: passed VO vertical flame test

KUBE flag and tee connectors

A cost-saving breakthrough in 90° and T-connections

Flag and tee connectors

Finally there's a fast, easy and affordable way to make those 90° and T electrical connections whenever and wherever you need them. Color-Keyed flags and tees are designed — and CSA/UL approved — to be used with standard Color-Keyed lugs and splices from #8 through 4/0 AWG in field-assembled configurations. Now you don't need to use high-cost flexible conductor for connections requiring 90° bending radius or expensive brazed or welded connectors for T connections. Insulated with custom-fit, halogen-free polypropylene for safety and performance, Color-Keyed flags and tees are available in bulk quantities for OEM applications and in a convenient kit for field use.

- Offers lowest installed cost for the application
- Versatile, modular design enables thousands of field-constructible connection possibilities, including multi-circuit configurations
- CSA certified and UL listed for field installation
- Insulated for fast, safe termination and installation
- Used with standard Color-Keyed lugs and splices
- Colour coded for easy selection of correct crimping die and easy certification of proper crimp
- Constructed from high-conductivity, low-resistance 99.9% pure wrought copper for optimum electrical performance
- Tin-plated for corrosion resistance and excellent contact

Technical specifications

- Connector: tin-plated copper
- Insulation: halogen-free polypropylene
- Standards: CSA Certified and UL Listed

Connectors for aluminum/copper code conductors

Designed and approved for use with both aluminum and copper conductors

One-hole lugs

- For 90 °C certified to 600 V and recommended up to 35 kV[†] applications
- Easily matched to the correct Color-Keyed installing die for positive compressions
- Hardened steel dies compress connector around cable, changing round strands to polygonal shapes and cold flowing strands and connector into a solid, homogenous mass

- Long compression areas ensure complete contact
- Multiple compressions prevent creep of aluminum conductors
- Filled with high-temperature oxide-inhibitor compound
- Electro tin plating prevents electrolytic corrosion of copper to ensure lowest contact resistance

Material – High-conductivity wrought aluminum

Finish – Electro tin plated

One-hole lugs[†]

Connectors for aluminum/copper code conductors

Designed and approved for use with both aluminum and copper conductors

Two-hole lugs

- For 90 °C certified to 600 V and recommended up to 35 kV[†] applications
- For aluminum and copper concentric conductors and compact code aluminum strandings
- Filled with oxide-inhibitor compound

Material – High-conductivity wrought aluminum

Finish – Electro tin plated

Two-hole lugs

Diagram

Bolt holes 3/8 in. on 1 in. centers, 1/2 in. on 1 3/4 in. centers.

[†] For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements.

For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Connectors for aluminum/copper code conductors

Range-taking narrow-tongue single-barrel lugs

- For 90 °C certified to 600 V and recommended up to 35 kV[†] applications
- Bolt holes on 1³/₄ in. centers
- Wire barrel factory-filled with oxide-inhibitor compound

Material – Aluminum

Finish – Tin-plated

Connectors for aluminum/copper code conductors

For aluminum-to-copper or aluminum-to-aluminum splicing

Two-way splice connectors

- Connectors are pre-filled with oxide-inhibitor
- For 90 °C certified to 600 V and recommended up to 35 kV[†] applications
- For aluminum and copper concentric conductors and compact code aluminum strandings
- Permit aluminum conductors to be spliced to copper or aluminum conductors

Material – High-conductivity wrought aluminum

Finish – Electro tin plated

Two-way splice connectors

Connectors for aluminum/copper code conductors

Splice aluminum conductors to copper conductors of equal ampacities

Aluminum reducing connectors

- For 90 °C, certified to 600 V and recommended up to 35 kV^{*} applications
- Filled with high-temperature oxide-inhibitor compound
- Designed for the right combination of equivalent sizes (example: 4/0 aluminum to 2/0 copper)
- Selection table gives aluminum/copper equivalents to all sizes

Material – High-conductivity wrought aluminum

Finish – Electro tin plated

Installing tools:

TBM5(S) #10 AWG – 4/0 AWG

TBM6(S) #10 AWG – 350 kcmil

TBM8(S) #10 AWG – 350 kcmil

* For installations from 16 kV up to 35 kV, consult shielded cable manufacturers for stress relief and insulation requirements. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Connectors for aluminum/copper code conductors

Much smaller than standard aluminum lugs for the same cable size

One-hole aluminum compact-size equipment lugs

- For 90°C, certified 600 V applications
- For use with aluminum cables only
- Can be directly substituted for equipment mechanical lugs in most applications
- Only 7 dies handle all 14 lug sizes
- Factory-filled with joint compound
- Electro tin plated
- Supplied with Neoprene insulating covers

One-hole aluminum compact-size equipment lugs

*For range-taking capability, use TBM8-750/TBM8-750M-1 Smart Tools. For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Transformer lug kits for aluminum code conductors

Everything you need to connect to a transformer in one convenient kit

Transformer lug kits

- For 90 °C, certified 600 V applications
- For use with aluminum cables only
- Include all necessary range-taking compression or mechanical-type lugs and bolting hardware to connect to designated transformers
- Lugs pre-filled with oxide inhibitor

Transformer lug kits

*To ensure proper range-taking compression on Color-Keyed equipment lugs, use Smart Tools (cat. nos. TBM8-750/TBM8-750M-1). For tool and die selection charts, see the section E31-E48 of the Tools, Dies and Kits catalogue.

Pin connectors for aluminum/copper code conductors

Converts an aluminum cable into a two-sizes-smaller copper pigtail

Bi-pin® bi-metal pin connectors

- For 90 °C, 600 V applications
- Upgrades connection by eliminating cold flow and oxidation of aluminum
- Reduces oversized aluminum cable
- Enables termination of aluminum cable into a copper-only lug
- Barrel prefilled with joint compound

Material – Copper wire/aluminum body

Finish – Electro tin plated

Insulator – Neoprene (600 V dielectric rating)

Bi-pin bi-metal pin connectors

Quick and easy insulation for H-type compression taps

Interlocking insulating soft covers

- Ideal for pigtail, 2-way splicing or tapping to an unbroken continuous main
- Insulation covers are not reusable

Technical specifications

- Material: Flame-retardant, high-impact polypropylene
- Colour: Black
- Voltage rating: 600 V max.
- Temperature: 90 °C

Interlocking insulating soft covers

Insulating covers for H-type compression taps

01

01 These insulating covers provide hard-shell insulated protection for "H" type compression taps and splices, and because there is no taping required, you get uniform quality and appearance each time. The exclusive locking design provides the range-taking capability. Only five H-tap insulating catalogue cover numbers accommodate the range of #6 AWG–1000 kcmil in the main, and #12 AWG–500 kcmil in the branch.

For H-tap applications

Cat. no.	Al H-tap	Cu H-tap

Interlocking insulating covers for "H" type compression taps.

For use in splice boxes, indoors or in tray indoors.

Place the H-tap in the cover and snap the cover closed.

Consult your regional sales office for flame-retardant version.

Technical data: HTC2 and HTC2S use insulation wrap instead of end cushions for inner seal.

Connector cat. nos. 54755 through 54790 and 63148 through 63180 require hydraulic crimping tools. Refer to instruction sheet.

Materials:

- Outer hard shell covers – High-impact black thermoplastic (Noryl), flammability class, UL 94V-1.

- Inner seal – Black neoprene sponge soft closed cell, oxygen index 28% UL 94 HBF.

Temperature rating – 90 °C maximum.

Certified voltage rating – 600 V maximum.

Note: Insulating covers are not reusable.

Insulating hard covers

- For indoor use in splice boxes and trays
- Easy to use – simply place H-tap in cover and snap cover closed
- Consult your regional sales office for available flame-retardant version
- Hard shell outer covers guard inner seal, keep out dust
- Installs quickly and easily without special tools – simply snaps together
- Eliminate time-consuming taping
- Provide high-quality, neat, uniform installations
- Range-taking design reduces inventory

Dimensions

Parallel splices

Ideal for use in transformer and motor/turbine windings

Tools

Cat. no.	Tools
540008	WT-115A, TBM8-750MI, TBM8-780BSCR
540006	TBM8-780M-I, TBM*-750BSCR, ERG2008 (6 AWG die)
540700	TBM8-750M-1, TBM*-750BSCR
540800 – 540900	TBM15I with die 15600X and 15615X
541000	TBM15I with die 15600X and 15604X

Color-Keyed parallel splices offer conductor-splicing solutions for hundreds of OEM, utility and communications applications. They're especially well suited for use in the manufacturing, repair and servicing of windings for transformers, motors, generators and turbines. Rely on them for excellent reliability, long-term performance and a CSA certified connection at a low-installed cost.

- Accommodate multiple wire sizes from #22 AWG to 500 kcmil for application flexibility
- Simple extruded-tube design for ease of use
- Chamfered barrel ends eliminate high-voltage corona and partial discharge failures
- Easy to install with standard compression crimp tools
- 99.9% pure copper for low resistance and high conductivity – tin-plated for corrosion resistance
- Certified for 600 V

Heavy-duty battery connectors and tools

Abrasion-resistant and engineered for optimum performance at both high and low temperatures

Battery/starter cables

- Fine flexible copper rope stranding PVC jacket conforms to SAE J1127 specifications
- Layer of paper separates insulation from copper, providing easy stripping with no stranding damage
- Temperature-rated for 80 °C
- Flexibility ideal for tight spaces and cold environments
- Color-Keyed markings for fast and accurate identification
- Marked in 1-ft. increments for easy measurement
- Available in red or black jacket colour

Material – High-conductivity copper

Finish – Electro tin plated

Installing tools – TBM5-SV or TBM5V

Heavy-duty battery cable

Specially designed for demanding industrial and OEM requirements

- 105 °C Temperature-rated and UL recognized
- Heavier PVC jacket conforms to SAE J1127 specifications
- Color-Keyed markings for fast and accurate identification
- Marked in 1-ft. increments for easy measurement

- Layer of paper separates insulation from copper for easy stripping with no strand damage
- 600 V rated available in bulk only
- Application-specific – To order, contact your regional sales offices

Heavy-duty battery connectors and tools

BCT840, BCT840S

TBM5SV, TBM5V

BCT840, BCT840S:

- Adjustable die crimping tools for Color-Keyed cast and tubular connectors
- The single die is an integral part of the tool; no dies to lose or misplace
- Available with Shure Stake mechanism to ensure a complete crimp every time (BCT840S)
- Crimp casting and tubular connectors ranging from #4 to 4/0 AWG

TBM5SV, TBM5V:

- Heavy-duty crimping tool including dies for #8–4/0 AWG battery connectors, lugs and splices
- Available with Shure Stake mechanism to ensure a complete crimp every time (TBM5S)

Crimping tools

Cat. no.	Description	Pkg. qty.
BCT840	Dieless crimp tool for cast and tubular battery connectors	1
BCT840S	Dieless crimp tool with Shure-Stake mechanism for cast and tubular battery connectors	1
TBM5V	Ratchet crimp tool with die for #8 to 4/0 AWG battery connectors	1
TBM5-SV	Ratchet crimp tool with Shure-Stake mechanism and die for #8 to 4/0 AWG battery connectors	1

- Cuts cable up to 500 kcmil
- Fiberglass handles and carbon steel blades
- For copper and aluminum cable only

Cable cutter

Cat. no.	Description	Pkg. qty.
364RF	Cutter for up to 500 kcmil copper and aluminum	1

Contact Tool Service for replacement blades.

Cable stripper

Cat. no.	Description	Pkg. qty.
BCS8-40	Cable stripper for #8 to 4/0 AWG battery cable with replacement blade provided in the handle	1

Accessories and miscellaneous hardware

Copper colloidal surface treatment protects, lubricates and enhances conductivity of all electrical connections

- Unique, homogenized blend of pure, polished colloidal copper, rust and corrosion inhibitors
- Simultaneously protects, lubricates and enhances conductivity of mating surfaces
- Extremely adhesive compound flows smoothly into uneven contours and voids, ensuring easy application and complete, positive protection and lubrication
- Won't settle out, thin, thicken, harden or dry out under the most severe environmental conditions
- Excellent temperature characteristics– can be brushed on at -45.5 °C (-50 °F) to 121 °C (250 °F) (other compounds either turn solid or run like water at these extremes) and remains intact at short terms even at 980 °C (1,800 °F)

Good connections are one of the most important aspects of electrical work. Mechanics know how much downtime is caused when fluids or oils leak into the raceway system or when they have to look for a weak link in a ground system caused by a high-resistance connection. Mechanics also know how much time is spent keeping contacts, switches, lugs and other connectors clean or replacing parts because of “green scourage” buildup. ABB has the solution to improve connections made in thousands of electrical and

raceway installations made each day by electricians everywhere. Kopr-Shield® compound may be used to advantage in all electrical installations. When the environment is hostile to electrical and mechanical connections, Kopr-Shield compound is a must.

Use Kopr-Shield compound for battery lugs and cables to:

- Prevent “green scourage” corrosion
- Reduce resistance
- Ease terminal installation and removal

Use Kopr-Shield compound for raceways to:

- Lubricate for ease of assembly and disassembly
- Improve grounding continuity (exceeds code requirements)

Use Kopr-Shield compound for fuse clips to:

- Eliminate hot spots for even heat distribution
- Prevent oxidation by preventing carbon path formation
- Lubricate for easy installation and removal of fuses

Use Kopr-Shield compound for wiping contacts, drum switches and slip rings to:

- Prevent galling, burning, pitting and discoloration
- Suppress arcing and dissipation of coronas
- Lubricate for ease of operation

Kopr-Shield joint compound

Cat. no.	Description	Std. pkg.	Weight lb/C
201-31879	1½-oz. Container with brush	96	11.46
201-31879-1	4-oz. Container with brush	24	38.54
CP8-TB	8-oz. Container with brush	12	64.58

ALUMA-SHIELD aluminum joint compound

Cat. no.	Contains	Description
21059	1-pt. Squeeze bottle	For aluminum cable connections; contains fine zinc particles which break through oxide film on cable strands upon compression of connection; ensures a low resistance contact and seals out air and moisture.
AP8	8-oz. Brush cap can	
M53	5-Gallon can	

Accessories and miscellaneous hardware

Belleville compression washers

- Essential when bolting aluminum lugs and connectors to bus bars with steel or brass hardware
- Maintain constant pressure in heavy-duty, high-temperature applications
- Available with or without flat washer

When bolting aluminum lugs and connectors to bus bars with steel or brass hardware, the recommended practice to ensure a tight connection is to use a Belleville spring washer on top of a flat washer under the bolt head or nut. For heavy-duty service where the heat rise is expected to exceed 30 °C above ambient, this procedure maintains constant pressure as the connector metals expand and contract with temperature changes.

Belleville compression washers

Diagram

Note: Ordering quantity must be in unit quantities and multiples thereof.

The Belleville washer should be installed with a larger flat washer to spread the high stresses of the compression washer edges over a large area of the lug and/or bus bar.

Dragon Tooth® transition washers

Quick, dependable and versatile.

- Connect copper-to-aluminum, copper-to-copper or aluminum-to-aluminum components
- Toothed surface penetrates aluminum and copper oxides
- Lower installed cost – no need to grind aluminum surfaces, apply compounds or use spring-type washers

Sealants and lubricants

Type CT — CONTAX™ oxide inhibiting compound

- Seals electrical connections from oxygen and moisture
- Non-water soluble, non-petroleum based polymer grease
- Nontoxic, will not irritate the skin
- Service temperature to 238 °C (460 °F); can be applied in -18 °C (0 °F) weather

Cat. no.	Description
CTA	½ oz. Package
CTB	4 oz. Plastic bottle
CTB8	8 oz. Plastic bottle
CTQ	Quart can
CTG	Gallon can

Type DX — Duct seal

- Seals around junction boxes, flashings, service mast entries, service cable entries and countless other applications
- Easy to use, forms around irregular surfaces and configurations
- Highly resistant to cracking, drying and shrinking
- Cuts and trims easily
- Can be painted immediately after application
- Grey colour
- No unpleasant odor
- -6.7 °C to 100 °C (20 °F to 212 °F) workable temperature range
- -40 °C to 121 °C (-40 °F to 250 °F) service temperature range
- Contains no asbestos
