

## Configuration methods

### Quick reference

Complicated cable routing layouts become simpler with ExpressTray. Once familiar with the basic configuration and support methods, the possibilities are unlimited.

Use the following pages as a guide to ExpressTray basics and as an inspiration for future projects.

<b>A</b>	Quiklok.....	B39	<b>I</b>	Horizontal tee or cross with a radius .....	B43
<b>B</b>	Connection of straight sections quick splice .....	B39	<b>J</b>	Horizontal tee or cross without a radius .....	B44
<b>C</b>	Reinforcement of straight section connections .....	B39	<b>K</b>	Reduction/expansion .....	B44
<b>D</b>	Connection of straight sections universal splice .....	B40	<b>L</b>	Cable drop-out.....	B45
<b>E</b>	Horizontal bend without a radius (90°) .....	B40	<b>M</b>	Large cable drop-out .....	B45
<b>F</b>	Horizontal bend with a radius.....	B41	<b>N</b>	Vertical drop .....	B46
<b>G</b>	Vertical bend without a radius (90°) .....	B42	<b>O</b>	Covers and bottoms .....	B46
<b>H</b>	Vertical bend with a radius .....	B42
