

Splices

Quick Splice

Dimensions

Connect straight lengths up to 24 in. wide using only two quick splices – no other components required. Simply bend tabs down and lock into position using pliers. Compatible with all profiles, the Quick Splice is available in pregalvanized steel, hot-dipped galvanized steel and stainless steel (Type 316).

EXPRESS TIP

Refer to page B37 for application example.

Tool required: pliers

Adjustable Splice

Dimensions

Used to construct angles or bends with a radius, the adjustable splice is designed for ease of installation when field-producing bends. Installed on the inside radius, this splice adjusts up to 1/2 in. and is ideally suited for any application where adjustment may be necessary. Compatible with all tray profiles, the adjustable splice is available in electro-galvanized, pregalvanized, hot-dipped galvanized and stainless steel (types 304 and 316).

EXPRESS TIP

Refer to pages B39, B41 and B42 for application examples.

Reinforcing Splice Bar

Dimensions

Used to reinforce connections of two straight sections of tray, the splice bar can also be cut to length using a bolt cutter and bent for use in Tee or Cross formations. Available in hot-dipped galvanized steel in two lengths. Splice bars can be ordered individually or as a kit that includes one (1) splice bar and three (3) bracket clamps (hot-dipped galvanized).

EXPRESS TIP

Refer to page B37 for application example.
