

## KUBE flag and tee connectors

A cost-saving breakthrough in 90° and T-connections

### Flag and tee connectors

Finally there's a fast, easy and affordable way to make those 90° and T electrical connections whenever and wherever you need them. Color-Keyed flags and tees are designed — and CSA/UL approved — to be used with standard Color-Keyed lugs and splices from #8 through 4/0 AWG in field-assembled configurations. Now you don't need to use high-cost flexible conductor for connections requiring 90° bending radius or expensive brazed or welded connectors for T connections. Insulated with custom-fit, halogen-free polypropylene for safety and performance, Color-Keyed flags and tees are available in bulk quantities for OEM applications and in a convenient kit for field use.

- Offers lowest installed cost for the application
- Versatile, modular design enables thousands of field-constructible connection possibilities, including multi-circuit configurations
- CSA certified and UL listed for field installation
- Insulated for fast, safe termination and installation
- Used with standard Color-Keyed lugs and splices
- Colour coded for easy selection of correct crimping die and easy certification of proper crimp
- Constructed from high-conductivity, low-resistance 99.9% pure wrought copper for optimum electrical performance
- Tin-plated for corrosion resistance and excellent contact
