## Overview

T&B Liquidtight fittings, engineered to perform in the toughest environments

### T&B Liquidtight metallic flexible conduit fittings

- 1. Gland deflects water** away from connector and prevents "pooling" of moisture. Look for the distinctive pumpkin appearance of the gland nut.
- 2. Self-Cleaning Threads** inside gland nut keep dirt and grime out of the threads as you tighten.
- 3. Double Beveled Sealing Ring** is designed with five unique sealing mechanisms and cannot be installed backwards. Manufactured of high-temperature rated thermoplastic to demanding specifications. Look for the unique T&B blue color ensuring the highest quality fitting.
- 4. Safe Edge Ground Cone** provides superior bonding, stronger pullout, easy threading and conductor protection. Look for the distinctive "ski slope" appearance within the "pumpkin" gland nut.
- 5. Heat-Curled Insulator** provides excellent wire protection and easier glide of conductors through and into the fitting. In addition, the heat-curled finish gives the insulator more strength than glue-in insulators. Look for the unique T&B blue color ensuring the highest quality fitting.
- 6. Precision Machined Rolled Threads** provide smooth, easy installations.
- 7. Tempered Cast Locknut with Teeth** provides superior strength and electrical bonding and can be installed without a wrench in the enclosure.
- 8. Revolver Grounding Fitting** Saves time and money using our infinitely adjustable rotating ground lug. Simply align the lug in your preferred position and tighten the gland. You'll never need to worry about tightening it into an inconvenient position again.

## Chemical resistance guide for liquidtight fitting

This document serves as a guideline only and compatibility should be verified in the application environment to ensure suitability. Many factors can determine the exact suitability; such as temperature, duration of contact, nature of contact such as submersion and concentration of the chemicals involved.

See chemical resistance guide GM7636 for T&B Liquidtight Flexible Metallic Conduit.

## Ingress protection

IEC 60529 IP Rating & NEMA 250 / UL50E Enclosures

IP suitability ratings are a system for classifying the degree of protection provided by enclosures of electrical equipment.

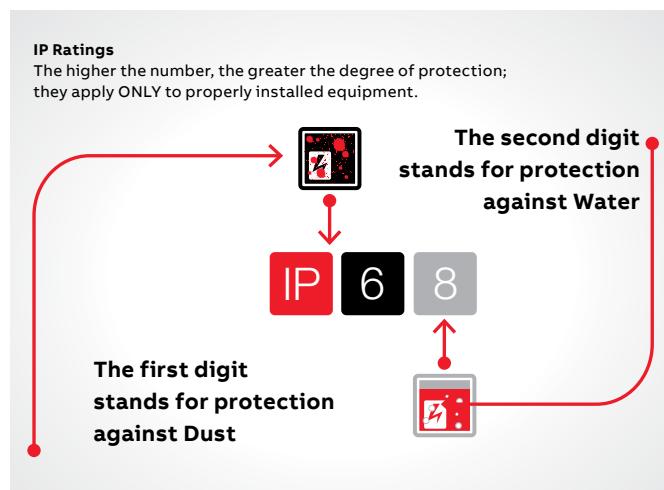

### Protection against Solid Bodies

Degree of protection for persons against access to hazardous parts inside the enclosure and/or against the ingress of solid foreign objects.

### Protection against Water

Degree of protection of equipment inside enclosures against damage from the ingress of water.

	0	No protection		0	No protection
	1	Objects greater than 50 mm, accidental touch by hands		1	Protected against vertically falling drops of water
	2	Objects greater than 12 mm, accidental touch by fingers		2	Protected against direct sprays of water 15° from vertical
	3	Objects greater than 2.5 mm, e.g. tools/wires		3	Protected against sprays of water to 60° from vertical
	4	Objects greater than 1 mm, e.g. tools/wires/small wires		4	Protected against water sprayed from all directions - limited ingress permitted
	5	Protected against dust - limited ingress (no harmful deposits)		5	Protected against low pressure jets of water from all directions - limited ingress permitted
	6	Totally protected against dust (Dust-tight)		6	Protected against strong pressure jets of water, heavy seas - limited ingress permitted

	7	Protection against the effects of immersion between 15cm - 1 m
	8	Protection against long periods of immersion under a quoted pressure, e.g. 2 bar at 24 hours
	9	IP69 Automotive standard DIN40050 and signifies resistance to high pressure jets of water (up to 80bar) from any angle
